

## Oferta pracy w projekcie NCN

<b>Ważność oferty:</b>	2405.2018 – 11.06.2018
<b>Województwo:</b>	Mazowieckie
<b>Nazwa jednostki:</b>	Zespół Inżynierii Lingwistycznej
<b>Firma:</b>	Instytut Podstaw Informatyki Polskiej Akademii Nauk
<b>Nazwa stanowiska:</b>	Technical leader/ co-investigator

### **Wymagania:**

We are looking for an experienced technical leader to act as a co-investigator in the project “Quantifiers in Language: Use & Meaning”. The candidate needs to have experience with technical leadership in previous annotation projects, linguistic annotation, analysis, design and implementation of annotation systems, active knowledge of the structure of the National Corpus of Polish, and expertise in natural language engineering.

### **Opis zadań:**

Leadership of all technical tasks, participation in preparation of annotation guidelines, expertise related to the National Corpus of Polish, participation in the design of the formats, interfaces and data structures for representation of quantified relations in the resulting corpus, technical verification of the annotation, evaluation of annotation tools, supervision of implementation and participation in the design and development of programming interfaces and their public deployment, analysis and verification of technical results.

**Okres i forma zatrudnienia:** umowa o dzieło

**Koszt wynagrodzenia:** 1500 PLN miesięcznie

### **Wymagane dokumenty:**

1. professional CV.

### **Miejsce składania dokumentów:**

Dokumenty należy składać w siedzibie IPI PAN w Warszawie, ul. Jana Kazimierza 5, na nazwisko Jakub Szymanik lub pocztą elektroniczną w plikach pdf na adres: [projekty@ipipan.waw.pl](mailto:projekty@ipipan.waw.pl)

**Informacje o projekcie:** The project is funded by the [Polish National Science](#)

[Centre](#) OPUS Grant. In the project we will build a quantifier corpus for polish language annotated with semantic information. The corpus and the toolkit for detecting and analyzing quantifiers will be freely available online. The project will also research various methodological bases for the development of further natural

language corpora annotated with other semantic and pragmatic phenomena. Based on the analysis of the corpus we will also be able to better understand the semantic and cognitive factors responsible for the natural use of language.

<b>Tytuł projektu:</b>	Kwantyfikatory w języku: użycie i znaczenie
<b>Kierownik projektu:</b>	Dr Jakub Szymanik
<b>Okres realizacji:</b>	19.04.2018 - 18.04.2021
