

Oferta pracy w projekcie NCN

Ważność oferty:	24.05.2018 – 11.06.2018	
Województwo:	Mazowieckie	
Nazwa jednostki:	Zespół Inżynierii Lingwistycznej	
Firma:	Instytut Podstaw Informatyki Polskiej Akademii Nauk	
Nazwa stanowiska:	PostDoc/co-investigator	

Wymagania:

We are looking for an experienced post doctoral researcher to join the project “Quantifiers in Language: Use & Meaning” as a co-investigator. Candidates for the above position should meet the following conditions:

- experience with annotation projects, linguistic annotation, analysis, design and implementation of annotation systems,
- knowledge of the structure of the National Corpus of Polish,
- expertise in natural language engineering, working knowledge of statistics, interest in theoretical aspects of linguistics.
- knowledge of logic and formal semantics (esp. generalized quantifier theory)
- knowledge of the linguistic complexity research

Opis zadań:

The co-investigator will be responsible for day-to-day research tasks, under the supervision of the PI and the technical leader. First, using the help of group of annotators and the project's programmer, the co-investigator will realize the task of building polish corpus annotated with quantifier information. Next, the co-investigator will collaborate with the PI on the theoretical projects studying quantifier distribution and logical properties wrt corpus data. Given the interdisciplinary nature of the project the co-investigator is expected to independently take research initiatives within the broadly defined scientific goals of the project.

Okres i forma zatrudnienia: umowa o pracę

Koszt wynagrodzenia: 8000 PLN miesięcznie

Wymagane dokumenty:

1. CV (including publication list)

Miejsce składania dokumentów:

Dokumenty należy składać w siedzibie IPI PAN w Warszawie, ul. Jana Kazimierza 5, na nazwisko Jakub Szymanik lub pocztą elektroniczną w plikach pdf na adres: projekty@ipipan.waw.pl

Informacje o projekcie: The project is funded by the [Polish National Science Centre](#)

[Opus](#) Grant. In the project we will build a quantifier corpus for Polish language annotated with semantic information. The corpus and the toolkit for detecting and analyzing quantifiers will be freely available online. The project will also research various methodological bases for the development of further natural language corpora annotated with other semantic and pragmatic phenomena. Based on the analysis of the corpus we will also be able to better understand the semantic and cognitive factors responsible for the natural use of language.

Tytuł projektu:	Kwantyfikatory w języku: użycie i znaczenie
Kierownik projektu:	Dr Jakub Szymanik
Okres realizacji:	19.04.2018 - 18.04.2021
